

HSA 600- Stand-a-lone automatic roll collation system.

An alternative to our three up collation system. The machine automatically fills up each of the shelves, with a capacity of 50 off 150mm diameter rolls. When all of the shelves are full the rewind machine automatically stops and a beacon or siren indicates to the operator that the stacks are full.

Rolls enter the stacker and are taken to the next available shelf.

Rolls are tipped onto the shelf.
